

Gelatin Manufacturers Institute of America

St 01062016/012

## Statement on GMO

The gelatin manufacturing process of GMIA members does not involve genetically modified materials (GMO). All raw material used in the gelatin production process by GMIA members are from animals which have been certified fit for human consumption by official veterinarian authorities.

In the case of gelatin, there has been no reported risk associated with the use of raw materials in the production process from animals that consume GMO products.
